

ISTI Open Access - Feature #16772

Reconsider what OpenPortal shows under the typologies

May 23, 2019 07:23 PM - Leonardo Candela

Status:	Completed	Start date:	May 23, 2019
Priority:	Urgent	Due date:	
Assignee:	Michele Artini	% Done:	80%
Category:			
Target version:	ISTI Open Portal Issues		
Description			
The list of products classified under <i>book</i> is really misleading. @bruna.baldacci@isti.cnr.it bring this issue to my mind.			
See https://openportal.isti.cnr.it/results?qf=type&qv=Book			
It contains mainly			
<ul style="list-style-type: none">• Editorial in Journals e.g. https://openportal.isti.cnr.it/doc?id=people_____:c069ba58da491c0398fa1c976468c9c3• (Conference) Proceedings e.g. https://openportal.isti.cnr.it/doc?id=people_____:88c691b08c9e4a54d724985fea2f3df7			
We should define and implement a strategy aiming at avoiding those items to be classified as books.			
I kindly ask @michele.artini@isti.cnr.it to document here the current mapping schema between People typologies and Open Portal typologies thus to help the discussion.

History

#1 - May 24, 2019 08:51 AM - Michele Artini

Current mapping schema:

PEOPLE TERM	-> OPENPORTAL TERM
"info:eu-repo/semantics/article"	-> "Article"
"info:eu-repo/semantics/bachelorThesis"	-> "Bachelor thesis"
"info:eu-repo/semantics/book"	-> "Book"
"info:eu-repo/semantics/conferenceObject"	-> "Conference object"
"info:eu-repo/semantics/doctoralThesis"	-> "Doctoral thesis"
"info:eu-repo/semantics/masterThesis"	-> "Master thesis"
"info:eu-repo/semantics/other"	-> "Other"
"info:eu-repo/semantics/bookPart"	-> "Part of book or chapter of book":
"info:eu-repo/semantics/patent"	-> "Patent"
"info:eu-repo/semantics/report"	-> "Report"

#2 - May 24, 2019 08:55 AM - Michele Artini

This is the native record of the first publication (Editorial in Journals):

```
<oai_dc:dc xmlns:oai_dc="http://www.openarchives.org/OAI/2.0/oai_dc/" xmlns=""
  xmlns:dc="http://purl.org/dc/elements/1.1/"

```

#3 - May 24, 2019 12:58 PM - Leonardo Candela

- Subject changed from *Reconsider what OpenPortal shows under the Book typology* to *Reconsider what OpenPortal shows under the typologies*

I see no problems/loss of information in the mapping. The issue is People side, i.e. the loss of information is in the mapping People performed at OAI-PMH records production time.

We should either liaise with People or put heavy corrective actions on our side, e.g. parse the HTML pages of People to get fine grained typologies to deal with.

The same is for products of type Other ... there is a significant amount of software product therein that is not emerging from OpenPortal.

#4 - May 24, 2019 01:21 PM - silvia giannini

I propose to ask again People staff to extract the field Type of Product as it appears in People.

#5 - Oct 12, 2020 09:09 PM - Leonardo Candela

- Related to Feature #19950: *Reconsider the harvesting pipeline to benefit from "possibly richer" metadata records added*

#6 - Oct 12, 2020 09:20 PM - Leonardo Candela

As a follow up of [#19950](#) we should be able to correct some of missclassification of items resulting from the mapping in place in People exported records.

The record are now equipped with two types: the one resulting from mapping and the native one used in People.

I believe that

- many of the current **books** will actually become **conference proceedings** http://purl.org/coar/resource_type/c_f744
- some of the current **articles** will actually become **editorial** http://purl.org/coar/resource_type/c_b239

#7 - Mar 10, 2021 05:13 PM - Leonardo Candela

- Priority changed from *High* to *Urgent*

#8 - Jun 30, 2021 09:37 AM - Michele Artini

- File *iop_types.xlsx* added

I attached a file that describes the new mapping.

#9 - Jun 30, 2021 11:06 AM - Leonardo Candela

- Status changed from *New* to *In Progress*

#10 - Jul 03, 2021 11:29 AM - Leonardo Candela

- File *Screenshot 2021-07-03 at 11.27.37.png* added

- Assignee changed from *silvia giannini* to *Michele Artini*

- % Done changed from *0* to *80*

The new mappings are in place. It looks fine to me but the 2 "Part of book or chapter of book" and "Contribution to book" ... we should use only the latter one.

Every object that is now in "Part of book or chapter of book" should go in "Contribution to book".

#11 - Jul 05, 2021 09:33 AM - Michele Artini

- Status changed from *In Progress* to *Completed*

I updated the vocabulary, now the portal shows only "Contribution to book" (708 results).
