

ISTI Open Access - Feature #16855

Faceted search options should be always aligned with the current query

Jun 04, 2019 03:36 PM - Leonardo Candela

Status:	New	Start date:	Jun 04, 2019
Priority:	Normal	Due date:	
Assignee:	Michele Artini	% Done:	0%
Category:			
Target version:	To Be Planned		
Description			
Right now the faceted search options are not refreshed when performing filtering activities, they remain populated by taking into account only the first query.			
This is confusing.			
The faceted search options should always be populated with values resulting from the under visualization result set.
