

## ISTI Open Access - Support #16919

### Discuss and define the set of publications that must appear in ISTI Open Portal (before 2002)

Jun 12, 2019 11:40 AM - Leonardo Candela

|   |                         |                    |              |
|---|-------------------------|--------------------|--------------|
| <b>Status:</b>  | Closed                  | <b>Start date:</b> | Jun 12, 2019 |
| <b>Priority:</b>  | High                    | <b>Due date:</b>   |              |
| <b>Assignee:</b>  | Leonardo Candela        | <b>% Done:</b>     | 100%         |
| <b>Target version:</b>  | ISTI Open Portal Issues |                    |              |
| <b>VREName:</b>   |                         |                    |              |
| <b>Description</b>  |                         |                    |              |
| Right now the ISTI Open Portal harvester collects all the papers in the People ISTI set   |                         |                    |              |
| However this set contains publications preceding the ISTI beginning, one publication is from 1979!  |                         |                    |              |
| I would suggest to harvest only ISTI publications (from 2002 on).   |                         |                    |              |
| For publications belonging to IEI we should find another approach, e.g. dump what was in PuMa.  |                         |                    |              |
| The benefit of this approach are many including the fact that we will have all IEI publications (rather than the partial view resulting from People). |                         |                    |              |
| This is an important discussion, before implementing any solution I'll like to hear the voice of the others.  |                         |                    |              |

#### History

- % Done changed from 0 to 100

In a recent discussion we agreed to collect all the material People classify under the ISTI Umbrella (set).

We revised the description of the openportal gateway to clarify this.
