ISTI Open Access - Task #25584

Task # 25582 (New): Migrate OpenPortal stack on the openstack infrastructure

Migrate OpenPortal front end to the openstack infrastructure

Sep 06, 2023 11:13 AM - Leonardo Candela

Status:	New		**Start date:**	Sep 06, 2023
Priority:	Normal		**Due date:**	
Assignee:	Michele Artini		**% Done:**	0%
Target version:	To Be Planned			

Description
This activity should be performed as follows: • we have to create a clone of the current Joomla instance in the new infrastructure; • we will use the Joomla migration procedure to move to Joomla 4; The resulting front end instance will be a development instance and will interact with the current back-end on the "old infrastructure" (namely Mongo and Solr instances). As a consequence, we should enable the new instance to interact with the existing instances of Mongo and Solr).
